DETAILED ACTION***Board Decision***

The rejection of claims 1-24 under 35 U.S.C. 103, dated August 15, 2005, was reversed by the Board of Patent Appeals and Interferences on December 21, 2006. The Board of Patent Appeals and Interferences stated that Nishimura fails to selectively adjust the brightness of regions of an image since the claim expressly required more than a single region to be adjusted.

The Board has not supplied any grounds of rejection not involved in the appeal for rejecting any pending claim, and the Examiner does not have specific knowledge of the existence of a particular reference or references which indicate non-patentability of any of the appealed claims as to which the examiner was reversed. Therefore, claims 1-24 are hereby considered to be allowable.

Allowable Subject Matter

Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance:

As for **claim 1**, the prior art does not teach or fairly suggest the use of a method of simulating fill flash in a camera system comprising the steps of determining distances from the camera to objects in a scene, taking a photograph of the scene *without using a flash*, and selectively adjusting the brightness of regions of the photograph based on the distance information.

As for **claim 7**, the prior art does not teach or fairly suggest the use of a camera system which simulates fill flash by determining distances from the

camera to objects in a scene, and taking a photograph of the scene *without using a flash*, and selectively adjusting the brightness of regions of the photograph based on the distances.

As for **claim 14**, the prior art does not teach or fairly suggest the use of a camera comprising means for determining distances from the camera to objects in a scene, means for taking a photograph *without using a flash*, and means for selectively modifying the brightness of regions in the resulting photograph based on the distances.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
